

Says...

Thinks...

Asking question throughout the class will not only make it more interactive but will also help you measure and impore student learning.

open-ended question work best for engaging students in discussion, as they offer the opportunity for debate

Resist the temptation to simply resond with praise or censure

Allow other students to provide a critique if it is warranted and continue to ask probing /guiding questions

The question you ask should help them practice these skills, as well as communicate the facts, ideas, and important to their learning in your course

Example, ask the rest of the class to respond to an idea that one student has just presentd, or ask the student who answered to explain the thinking that led to their answer

Connections Learning Center provides a small, structured, educational setting for students in grades 6-9

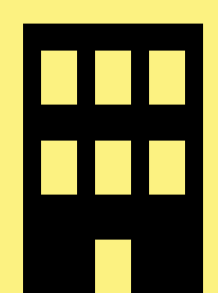

Students have an opportunity to explore post secondary and career options through our Career and Technology Education courses

Then, we'll work together on bilding your learning center, tagging and sorting your content accordingly

Implement tutoring programs to provide one-on-one assistance to students

Tutors can provide weekly academic help in reading and math, help students with decision-making, and work ith students to develop specific academic and social goals.

Support positive academic competition within and among schools.
